RECOMMENDED TOOLS

Heavy Duty Rubber Cutter

Clip Alignment Tool (Provided by LUXTECH)

Optic Lens

Mounting Clip

PROCEDURE

1

Install LUXroll into fixture

Once the full length of LUXroll is adhered to the fixture, firmly press to ensure full-contact adhesion - the tape is pressure sensitive.
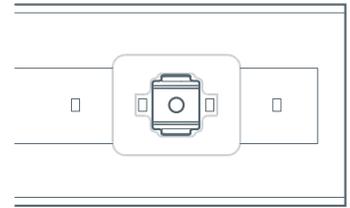

2

Place Alignment Clip onto LUXroll

Use alignment tool to ensure clips are installed at proper location.

3

Install mounting clips onto LUXroll

Remove adhesive backing and firmly press and adhere to LUXroll.

4

Maximum 12" Distance

Space clips accordingly

Maximum spacing between clips is 12". Minimum of 2 clips per optic.
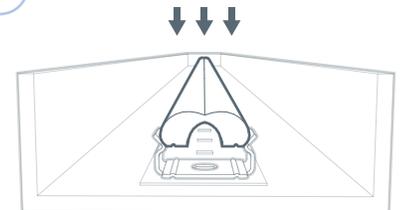

5

Cut optic to size as needed

Measure the length of optic required. If the needed length is >47", multiple pieces of optic can be installed end to end. Make sure that each optic piece is attached with at least 2 clips.

6

Snap optic into mounting clips

Align the optic with the module from above and press down firmly. A click will indicate that the optic is fully seated.
